

PANCHAL ZEEL

Contact : 6355265513 **Email :** panchalzeel2007@gmail.com **Location :** Randheja , Gandhinagar

ABOUT ME

Results-driven Computer Engineering student with strong expertise in full-stack development, backend engineering, and API design. Proficient in building scalable, production-grade applications with a focus on robust business logic, RESTful API development, and efficient error handling. Possesses foundational knowledge of Blockchain technology and Blue Carbon systems, with a growing interest in Machine Learning and Large Language Models. Passionate about solving real-world problems through clean architecture, intelligent system design, and continuous learning.

EDUCATION

Bachelor of Engineering in Computer Engineering 2025–28

Gujarat Technological University • GTU-SET

Diploma in Computer Engineering 2022–25

Government Polytechnic Gandhinagar, Gujarat • Final CGPA: 9.17

TECHNICAL SKILLS

Frontend: HTML5, Tailwind CSS, Bootstrap, JavaScript

Backend & Frameworks: Python, Java, PHP, Django, FastAPI, REST API

ML & Data: Machine Learning, Scikit-learn, PyTorch, TensorFlow, OpenCV, NumPy, Pandas

PROFESSIONAL EXPERIENCE

H&B Pvt. Ltd.

Python & Django Backend Intern

2025

- Developed and maintained backend modules and RESTful APIs using Django REST Framework
- Designed and optimized database schemas and performed complex ORM-based queries
- Built scalable application logic for business workflows and third-party API integrations

AI-Based Detection and Prediction System from Satellite Images

- Designed end-to-end ML pipeline including preprocessing, training, and evaluation
- Integrated multiple algorithms for better insights
- Generated automated outputs for decision-making

Blockchain-Based Blue-Carbon MRV System

- Developed a decentralized platform to monitor and manage carbon credits using blockchain technology
- Integrated satellite imagery analysis with machine learning to detect environmental changes and carbon impact
- Implemented secure and transparent carbon credit tracking using smart contracts
- Designed a system to prevent fraud and ensure authenticity in carbon credit transactions
- Worked on data preprocessing and model building for environmental analysis

KEY COMPETENCIES

- Full-Stack Development • Machine Learning & Deep Learning • Problem Solving
- Data Analysis • Critical Thinking & Model Optimization • Team Collaboration & Adaptability
